SUMMARY

Senior iOS Developer with 6+ years building and scaling production apps in Swift and SwiftUI, including full ownership of engineering quality for an app with 60,000+ daily active users. Experienced leading remote iOS teams, modernizing legacy codebases into MVVM/Clean Architecture, and building CI/CD pipelines with Fastlane and XCTest. Early adopter of AI-assisted engineering workflows (Claude, Codex) to speed up debugging and feature delivery.

EXPERIENCE

Numrah | Senior iOS Developer | Remote

Jan 2024 - Present

- Lead the iOS engineering team for a production app with 60,000+ daily active users, owning release quality, app stability, and feature delivery.
- Redesigned core UI/UX with 20+ custom SwiftUI/UIKit animations and full Dark Mode support; built XCTest/UI automation suites that improved release reliability and cut regressions.
- Migrated the codebase to a modern MVVM architecture and introduced Statsig (feature flags/A-B testing) and Bugsee (crash diagnostics); adopted AI-assisted tooling (Claude, Codex) into the workflow, reducing average debugging time by 30%.

FiveRivers Technologies | Senior iOS Developer

Jan 2023 - Jan 2024

- Led a new iOS app from concept to release, architecting secure, cloud-backed infrastructure under Agile delivery.
- Built a SwiftUI-based image detection feature that reduced app load time by 20% and increased user interaction by 10%.
- Integrated WalletConnect for in-app crypto wallet connections, improving checkout flow and UX.

Synavos Solutions | iOS Developer

Oct 2021 - Jan 2023

- Improved app performance by 30% by designing an advanced data caching layer, contributing to a 20% increase in app downloads.
- Built and maintained a Fastlane-based CI/CD pipeline, cutting build times by 50% and improving code review turnaround by 80%.
- Implemented push notification infrastructure that increased user retention by 40%.

- Introduced design patterns and refactoring practices that reduced app crash rate by 30%, saving an estimated 200 engineering hours.
- Streamlined the development process to consistently ship updates ahead of schedule, improving user retention by 15%.
- Led a small team building new logistics applications, improving operational workflow efficiency by 40%.

Production Applications

FadFed ([AppStore](#))

- Migrated a legacy Swift 3 codebase to a modern SwiftUI architecture, reducing debugging time by 30% and improving performance and maintainability; added an XCTest/UI automation suite to strengthen release quality.
- Led the iOS team in delivering 25+ new features, custom animations, and 100% Dark Mode support, plus iCloud Backup & Sync, enabling CI/CD automation and stable production releases.

4ART ([AppStore](#))

- Built and launched a Virtual Art Gallery experience with multi-language localization and intuitive navigation, delivering a seamless cross-cultural user experience.
- Improved UI/UX and overall app performance, increasing usability by 30%.

ENERGY RADIO KSA ([AppStore](#))

- Implemented Google Chromecast support for a radio streaming app, extending playback to connected TVs and speakers.
- Integrated Apple AirPlay for seamless casting across Apple devices, contributing to a 10% rise in customer satisfaction.

HITACHI ([AppStore](#))

- Built a hardware-showcasing app from scratch under a tight delivery timeline, contributing to a 10% increase in sales.
- Worked closely with design and product stakeholders to iterate quickly on UI while maintaining release quality.

PORTFOLIO & CERTIFICATIONS

Portfolio

EDUCATION

UNIVERSITY OF MANAGEMENT & TECHNOLOGY

Bachelors in Computer Sciences

Sept 2015 - Oct 2019

SKILLS

Languages & Frameworks: Swift, SwiftUI, UIKit, Objective-C, Combine, Swift Concurrency, Async/Await, Grand Central Dispatch (GCD)

Architecture & Design: MVVM, MVC, Clean Architecture, VIPER, SOLID Principles, Design Patterns, Dependency Injection, Modular Architecture

iOS Platform: Swift Package Manager (SPM), CocoaPods, URLSession, REST APIs, GraphQL, JSON, Core Data, CloudKit, UserDefaults, APNs (Push Notifications), WebSockets, Deep Linking, Universal Links, Localization, Dark Mode

Testing & Performance: XCTest, Unit Testing, UI Testing, UI Automation, Test-Driven Development (TDD), Debugging, Crash Analysis, Performance Optimization, Memory Management, Multithreading, Instruments, Time Profiler, Memory Graph Debugger, Thread Sanitizer

DevOps & Tooling: Xcode, Git, GitHub, GitHub Actions, Fastlane, CI/CD, TestFlight, App Store Connect, Code Review

Backend & Analytics: Firebase, Firebase Analytics, Crashlytics, Statsig, Feature Flags, A/B Testing, Bugsee

AI-Assisted Development: Claude, OpenAI Codex, AI-Assisted Development, LLM Integration, Prompt Engineering

Leadership & Delivery: Technical Leadership, Team Management, Mentoring, Agile/Scrum, Software Development Lifecycle (SDLC), Sprint Planning, Release Management, Cross-functional Collaboration
