SUMMARY

Senior iOS Engineer with 6+ years of experience designing and developing scalable iOS applications using Swift, SwiftUI, UIKit, and Objective-C. Proven expertise in leading remote engineering teams, modernizing legacy codebases, implementing CI/CD, and integrating AI-powered development tools to deliver high-quality mobile applications serving 60K+ daily active users.

EXPERIENCE

Numrah | Senior iOS Developer | Remote

Jan 2024 - Present

- Led the iOS engineering team supporting an application with 60,000+ daily active users (DAU), improving release quality, ensuring high app stability, and delivering scalable feature rollouts.
- Enhanced the app's UI/UX by implementing 20+ custom SwiftUI/UIKit animations, introducing Dark Mode and modern interaction patterns, while developing XCTest/UI automation test suites to improve release reliability and CI/CD quality.
- Modernized the iOS codebase by migrating the project to a modern architecture and integrating Statsig, Bugsee, Codex, and Claude, reducing debugging time by 30%, accelerating feature experimentation, and increasing overall developer productivity.

FiveRivers Technologies | Senior iOS Developer

Jan 2023 - Jan 2024

- Led the development of a new iOS app, from conceptualization to release using secure backend infrastructure utilizing cloud technologies, which resulted in 50% stakeholder satisfaction, using agile software development methodology.
- Developed SwiftUI framework for image detection, decreasing app load time by 20% and increasing user interaction by 10%.
- It is enhanced with Wallet Connect Integration, resulting in a 5% best UI/UX experience for the mobile app.

Synavos Solutions | iOS Developer

Oct 2021 - Jan 2023

- Optimized app performance by 30% by implementing an advanced data caching system, resulting in a refined user experience and a 20% increase in app downloads.
- Integrated CI/CD pipeline, reducing build time by 50% and increasing code review efficiency by 80%, resulting in a 20% increase in app stability and user satisfaction.
- Effectuate push notifications and escalate user remembrance by 40% resulting in a 15% profit boost for the company.

- Added new design patterns to improve code quality. Reduced app crashes by 30%. Saved 200 hours of development time.
- Exercised efficient management techniques to streamline the development process and deliver app updates weeks ahead of schedule, increasing user retention by 15%.
- Lead development team in creating new logistics applications, increasing efficiency by 40%.

PROJECTS

FadFed

- Spearheaded the migration of a legacy Swift 3 codebase to a modern SwiftUI architecture, reducing debugging time by 30%, improving application performance, increasing code maintainability, and implementing XCTest/UI automation to strengthen release quality.
- Led the iOS team to deliver 25+ new features, custom animations, 100% Dark Mode support, iCloud Backup & Sync, and a comprehensive XCTest/UI test suite, accelerating feature delivery, enabling CI/CD automation, and maintaining production stability.

4ART

- Developed and launched key features including a Virtual Art Gallery, multi-language localization, and intuitive navigation, delivering a seamless cross-cultural user experience while improving application accessibility and maintainability.
- Enhanced the app's UI/UX and overall performance, resulting in a 30% improvement in usability.

Febys

- Designed the Viper Architecture for this project, reducing development time by 30%.
- Led a team of 2 junior iOS developers in the successful completion of a real estate project, resulting in a 5% increase in sales for the company.

TICKETLAKE

- Optimized Charts by redesigning the UI and implementing real-time data updates, resulting in a 25% increase in user engagement and a 20% increase in monthly active users.
- Integrated Payment SDK (PayPal) to offer more payment options, resulting in a 40% increase in successful transactions and a 10% increase in revenue for the business.
- Streamlined logistics of artwork transportation using the Artworks Application, reducing shipping costs by 15%.

ENERGY RADIO KSA

Imposed Google Chrome cast and Apple Airplay features for a radio application, resulting in a 10% rise in customer satisfaction.

HITACHI

- Developed a hardware showcasing app from scratch within tight timelines, resulting in a 10% increase in sales and positive customer feedback.
- Promoted continuous learning in software development and user interface design.

ECIINIC

- Medical application which strengthened user-patient interaction by 30% resulting in a 10% increase in doctor appointment bookings.
- Designed a Video Calling feature for a Medical Application which improved doctor-patient communication by 40%, leading to a 25% decrease in no-show appointments.

EDUCATION

UNIVERSITY OF MANAGEMENT & TECHNOLOGY

Bachelors in Computer Sciences

Sept 2015 - Oct 2019

SKILLS

Swift, SwiftUI, UIKit, Objective-C, iOS SDK, Xcode, Swift Package Manager (SPM), CocoaPods, Git, GitHub, GitHub Actions, CI/CD, Fastlane, XCTest, Unit Testing, TestFlight, App Store Connect, MVVM, MVC, Clean Architecture, SOLID Principles, Design Patterns, Dependency Injection, Swift Concurrency, Async/Await, Combine, REST API, API Integration, URLSession, JSON, GraphQL, Firebase, Firebase Analytics, Crashlytics, CloudKit, iCloud, Core Data, UserDefaults, StoreKit, Push Notifications (APNs), WebSockets, Performance Optimization, Memory Management, Multithreading, Statsig, Feature Flags, A/B Testing, AI Integration, Claude, Codex, LLM Integration, Prompt Engineering, Agile Software Development, Scrum, Software Development Lifecycle (SDLC), Cloud Integration, Software Design Patterns, Leadership, Team Management, Code Review, Mentoring, Mobile Application Development, UI/UX.
